

If you are having trouble in your Google Meet, first try updating your device.
Log in. Click on the “time” in the lower right corner.
Click on the settings wheel.

Look for “**About Chrome OS.**” It should be at the bottom of the left column.
Click on it. (OS means Operating System)
If the OS is 85 or less, you need to update. **Check for Updates.**

When the **Restart** button shows up, click on it.
Check to see if the device has updated to 86 or higher. If not, do it again.
