Evaluate Student Work for the 2024 Lt. Governor's Computing Challenge

LT. GOVERNOR'S
Computing Challenge

FACT #1: Students seek to solve real-world problems with computing.
FACT #2: YOU can contribute to that effort as a JUDGE! NO CODING EXPERIENCE NECESSARY.

The LGCC asks students in **grades 3-12** to use computing to solve a problem under the theme, *Coding for Good*.

Your evaluation of the submissions will be crucial in selecting **winners across multiple categories: Concept, Prototype, and Development**. (Various degrees of coding and computing are required in these categories.)

It's all online, and you will be given evaluation criteria. These [LGCC FAQs](#) can provide additional guidance.

The challenge is ON!
Submissions are due April 26, 2024.

Your commitment: to evaluate 8-10 student submissions over 2.5 weeks (May 6-22).
